Mike I need a search approved for sequences which are longer than 9,999. The claims require that I search polypeptide encoded by the nucleic acid of SEQ ID NO:1, 3, 5, 46, 47 and 48. SEQ ID NOs 47 and 48 are 18,989 and 50,000 bases respectively. If approved could you forward it to Christina for a rush search approval and ask her to cc me so I can keep a track of the search. The case is a board case that need to be moved and is on the special amended docket.
